AAPT Summer Meeting • University of Michigan • Ann Arbor, MI • July 25–29, 2009

Why Your Organization Should Sponsor

>>> an AAPT National Meeting

>>> Programs and Activities

The AAPT 2009 Summer Meeting will be held on the campus of the University of Michigan from July 25 to the 29th. It will bring to campus 1,200 physics educators from across the educational spectrum (high schools through research universities), physics undergraduate and graduate students, physicists from research centers and foundations interested in promoting and funding physics, and corporate associates whose products and programs are designed to strengthen physics teaching and learning.

The meeting encompasses professional development workshops for novice and master teachers; more than 40 interactive half-day workshops, several special day-long programs on teacher preparation and physics education research, a three-day academic meeting with 6 plenary sessions and award lectures and more than 500 papers on a variety of topics relevant to physics. The business meeting of the Association (gatherings of committees, Board, and section representatives) also takes place during these days.

>>>Physics Education

A 75-year-old organization, the American Association of Physics Teachers is an international society of 10,000 members who share a great passion for physics and a strong commitment to teaching. AAPT is dedicated to advancing physics education at all levels for the public good.

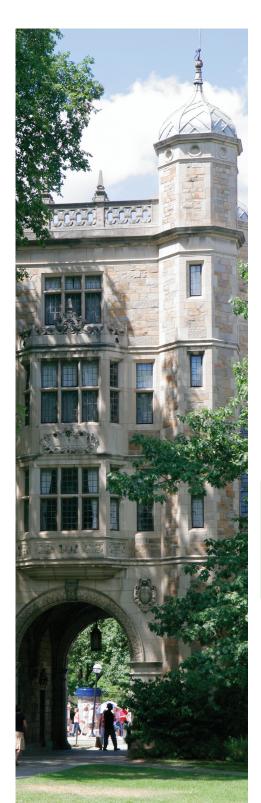

Supported by a strong volunteer base and a central professional operation at the American Center for Physics in College Park, MD, U.S.A., AAPT fulfills its mission by publishing scholarly journals (the American Journal of Physics and The Physics Teacher) and online resources (ComPADRE, in partnership with APS, AAS and AIP). AAPT also organizes two annual academic meetings, dozens of topical conferences and workshops (among them a 12-year-old workshop for New Faculty in Physics and Astronomy, with APS and AAS; and a conference for physics chairs, with APS); administers large-scale professional development programs (e.g., the 23-year-old PTRA program); and engages in public outreach and advocacy (including the PhysTEC Project to increase the number of physics teachers, with APS and AIP; and the sponsorship of the U.S. Physics Team at the International Physics Olympiad).
