

Volume 2: Electricity, Instructor Materials

Table of Contents

Contents	Page No.
I. Introduction	
A. Overview of the Unit	1
B. Acknowledgments and Origins of Ideas	2
C. General Safety Considerations	2
II. Students' Notions about Electricity	
A. Students' Prior Beliefs as Described in the Research on Student Conceptions	3
B. Conceptions that Students Might Develop	5
III. Cognitive Rationale	7
IV. Instructor Notes	
A. Equipment List	10
B. List and Suggested Sequence of Student Investigations/ Activities	11
C. Student Investigations with Embedded Instructor Notes	
<i>Investigation E1: Batteries and Bulbs</i>	13
Activity E1.1: What conditions do you think enable the bulb to light?	17
Activity E1.2: Where is the circuit in a flashlight?	25
Activity E1.3: Which way do you think the electricity goes?	27
Activity E1.4: Adding Another Bulb	33
Activity E1.5: Comparing Bulb Brightnesses	39
Activity E1.6: Does electricity in wires have any effects on a compass?	45
Activity E1.7: Which runs batteries down quicker, circuits with more bulbs or circuits with fewer?	53
Activity E1.8: Taking Stock	59
<i>Investigation E2: "Obstacleness and Oomph"</i>	61
Activity E2.1: Lengths of Wires and How They Affect Bulbs or Compasses	65
Activity E2.2: Wires of Different Materials and How They Affect Bulb Brightness	69
Activity E2.3: Adding More "Oomph" to a Circuit by Adding More Batteries	73
<i>Investigation E3: Capacitors and Their Effect on Electricity</i>	77
Activity E3.1: A Capacitor and How it Affects a Circuit	81
Activity E3.2: Closing the Switch and Compass Deflection	87
Activity E3.3: The Flow of Electricity in a Circuit with a Capacitor and a Battery	91

<i>Investigation E4: Electric Charge</i>	99
Activity E4.1: Generating Charged Tape	105
Activity E4.2: How do you think that two pieces of tape charged in the same fashion will interact?	109
Activity E4.3: The Interaction of Differently Charged Tapes	111
Activity E4.4: Another Variation of Charged Tapes	115
Activity E4.5: How Uncharged Tapes Affect Charged Tapes	119
Activity E4.6: Determining the Charge of an Unknown Tape	123
Activity E4.7: Influencing the Charge to Move Within a Wire	125
<i>Investigation E5: Batteries, Bulbs, and Capacitors</i>	133
Activity E5.1: In which direction does the electricity move in the circuit?	137
Activity E5.2: Do Capacitors Affect the Response of the Bulb and Compass?	141
Activity E5.3: Increasing the Barriers to See if it Affects Bulb Brightness and Compass Response	149
Activity E5.4: Increasing the Resistance Quantity to See if it Affects Bulb Brightness, Compass Response, and Time	153
Activity E5.5: Recasting the General Rules in New Terms	157
<i>Investigation E6: Circuits with Multiple Paths</i>	159
Activity E6.1: Comparing Bulb Brightness When Adding a New Bulb	165
Activity E6.2: How Adding More Bulbs Affects Bulb Brightness and Compass Behavior	171
Activity E6.3: Comparing Two-bulb and Three-bulb Circuits	177
Activity E6.4: What runs batteries down quicker, circuits with more bulbs or circuits with fewer?	179
Activity E6.5: Is the current through the batteries always the same from circuit to circuit?	183
Activity E6.6: Comparing Circuits	185
<i>Investigation E7: Electric Circuits</i>	201
Activity E7.1: Comparing New Circuits and New Current Predictions	205
Activity E7.2: Comparing Bulb Brightness and Current in a More Complicated Circuit	211
D. Focus on Science	
Focus on Science E4.6: Three Letters from Benjamin Franklin	217
E. Sample Assessment	221
F. List of References for Electricity	241
