

Volume 2: Electricity, Student Materials

Table of Contents

Contents	Page No.
I. Student Investigations/Activities	
<i>Investigation E1: Batteries and Bulbs</i>	1
Activity E1.1: What conditions do you think enable the bulb to light?	2
Activity E1.2: Where is the circuit in a flashlight?	5
Activity E1.3: Which way do you think the electricity goes?	6
Activity E1.4: Adding Another Bulb	9
Activity E1.5: Comparing Bulb Brightnesses	12
Activity E1.6: Does electricity in wires have any effects on a compass?	16
Activity E1.7: Which runs batteries down quicker, circuits with more bulbs or circuits with fewer?	21
Activity E1.8: Taking Stock	24
<i>Investigation E2: "Obstacleness and Oomph"</i>	25
Activity E2.1: Lengths of Wires and How They Affect Bulbs or Compasses	26
Activity E2.2: Wires of Different Materials and How They Affect Bulb Brightness	28
Activity E2.3: Adding More "Oomph" to a Circuit by Adding More Batteries	31
<i>Investigation E3: Capacitors and Their Effect on Electricity</i>	33
Activity E3.1: A Capacitor and How it Affects a Circuit	34
Activity E3.2: Closing the Switch and Compass Deflections	39
Activity E3.3: The Flow of Electricity in a Circuit with a Capacitor and a Battery	43
<i>Investigation E4: Electric Charge</i>	49
Activity E4.1: Generating Charged Tape	50
Activity E4.2: How do you think that two pieces of tape charged in the same fashion will interact?	53
Activity E4.3: The Interaction of Differently Charged Tapes	55
Activity E4.4: Another Variation of Charged Tapes	58
Activity E4.5: How Uncharged Tapes Affect Charged Tapes	61
Activity E4.6: Determining the Charge of an Unknown Tape	63
Activity E4.7: Influencing the Charge to Move Within a Wire	65
<i>Investigation E5: Batteries, Bulbs, and Capacitors</i>	71
Activity E5.1: In which direction does the electricity move in the circuit?	72
Activity E5.2: How Capacitors Affect the Response of the Bulb and Compass	74

Activity E5.3: Increasing the Barriers to See if it Affects Bulb Brightness and Compass Response	78
Activity E5.4: Increasing the Resistance Quantity to See if it Affects Bulb Brightness, Compass Response, and Time	80
Activity E5.5: Recasting the General Rules in New Terms	84
<i>Investigation E6: Circuits with Multiple Paths</i>	86
Activity E6.1: Comparing Bulb Brightness When Adding a New Bulb	87
Activity E6.2: How Adding More Bulbs Affects Bulb Brightness and Compass Behavior	91
Activity E6.3: Comparing Two-bulb and Three-bulb Circuits	95
Activity E6.4: What runs batteries down quicker, circuits with more bulbs or circuits with fewer?	96
Activity E6.5: Is the current through the batteries always the same from circuit to circuit?	98
Activity E6.6: Comparing Circuits	99
<i>Investigation E7: Electric Circuits</i>	113
Activity E7.1: Comparing New Circuits and New Current Predictions	114
Activity E7.2: Comparing Bulb Brightness and Current in a More Complicated Circuit	118
II. Focus on Science	
Focus on Science E4.6: Three Letters from Benjamin Franklin	122
