

Joe Cossette has been teaching physics and physical science for the past 10 years at Minnetonka High School in Minnesota. Before becoming a teacher, he worked as a mechanical engineer and is passionate about helping students make real world connections with the science content in the classroom. He spends a lot of time brainstorming creative ways to make learning fun and interesting and shares many of his lesson ideas for free on his website "Passionately Curious" (passionatelycurioussci.weebly.com) Joe lives in Minnesota with his wife and two toddler scientists.
