THE AAPT/ALPhA Award for UNDERGRADUATE PHYSICS STUDENTS

AAPT and ALPhA (Advanced Laboratory Physics Association) announce the AAPT/ALPhA Award for Undergraduate Physics Students who have executed, mastered, and left as a legacy for future students an Advanced Laboratory Experiment

Do you have a student (or team of students) who might be interested in taking up the challenge to build an experiment new to their own department and possibly receive national recognition, a trip to a national AAPT meeting, an invited talk, and a check for \$4,000?

The AAPT/ALPhA Award is now open for Preliminary Prospectus and/or Portfolio Submissions. This award was established to recognize outstanding work in the development of an advanced laboratory apparatus/experiment by an undergraduate physics student at his/her home institution within the greater United States. National recognition of these projects will encourage their proliferation and help build the next generation of experimental physicists and educators. Deadline for Portfolio Submission for projects completed in the 2013-14 academic year is September 1, 2014 and for projects completed in the 2014-15 academic year is September 1, 2015. The first award will be presented at the 2016 AAPT Winter Meeting in New Orleans.

For more details see http://www.aapt.org/Programs/awards/aapt_alpha_award.cfm.

Funding for this award, for the first five years, is provided by TeachSpin, Inc.
